PROJECTS

Kicksnation - Shoes E-commerce (Advance Redux State Management Project With Firebase - Auth())

CHECK - ADVANCE STATE MANAGEMENT USING REDUX ↗

- Utilized advanced web development technologies such as Tailwind CSS, React Router, Firebase Authentication and Redux for seamless design and efficient state management.
- Implemented Redux to create a comprehensive tree state management system, providing a smooth shopping experience for customers on the Kicksnation Shoes E-commerce website.

Bluebox - Single Landing Page

CHECK - TAILWIND SEAMLESS DESIGN ↗

- Utilized advanced web development technologies such as Tailwind CSS and React Router to provide a seamless experience for users.
- Implemented animations using state to create a comprehensive design display, resulting in a smooth user experience on the 'Bluebox' landing website.

Quatify - API Project (Intermediate Redux State Management)

CHECK - REDUX STATE MANAGEMENT WEBSITE ↗

- Built a Redux state management website that allows users to add and store quotes in their wishlist, utilizing advanced state management techniques along with reducers, context API, and React Router.
- Designed and optimized the user interface with Tailwind CSS, resulting in a seamless user experience.
